DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 recites the limitation "the angle" in line 1. There is insufficient antecedent basis for this limitation in the claim. The claim is believed to depend on claim 5.

Claim 8 recites the limitation "the base and the length" in lines 1-2. There is insufficient antecedent basis for this limitation in the claim. The claim is believed to depend on claim 7.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsutsui.

Claims 1, 3 and 5-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Stoyanoff.

Regarding claim 6, as permissibly gleaned from Figure 2c, the angle is about 40 degrees.

Claims 1, 3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Park et al (Figure 11e).

Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Kido et al.

Art Unit: 3753

In the rejections above, the recitation of "for a vehicle" is considered to be a statement of intended use, even if claimed, does not merit patentable weight unless the body of the claim refers back to, is defined by, or otherwise draws life and breadth from such intended use. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 4 and 11-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stoyoff or Park et al.

Stoyoff or Park et al discloses all the claimed limitations except the proportion of vortex generator louvers to non-vortex generator louvers.

To employ any number of vortex generator louvers is considered to be an obvious design expedient, producing no new and/or unexpected results and solving no stated problem. One of ordinary skill in the art would employ any number of vortex generator louvers for the purpose of achieving a desired pressure drop and heat exchange.

Regarding claim 4, one of ordinary skill in the art would employ any spacing between mini-vortex generators for the purpose of achieving a desired pressure drop and heat exchange.

Regarding claims 11-12, the specific dimensions of the louvers is considered to be an obvious design expedient, producing no new and/or unexpected results and solving no stated

problem. One of ordinary skill in the art would employ an louver dimension for the purpose of achieving a desired pressure drop and heat exchange.

Allowable Subject Matter

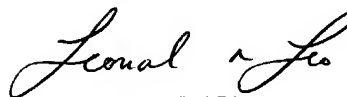

Claims 7-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
